

ENGLISH CORNER INFANTIL

Children in Infant Education have worked St. Valentine with teacher Marisa, they watched a power point presentation and they learnt all related to love: we have to love our family, teachers, friends and pets too. After that they colored a heart in arts and crafts, here you have some examples.

THE WATER CYCLE

Children from 1st grade have studied about water in nature, where you can find it and what it is used for. They have learnt the water cycle and it has been very interesting. These beautiful pictures are a good example:

SECOND GRADE: ANIMALS CLASSIFICATION

In second grade, we have worked with animals and we have learnt to classify them depending on the food they eat, depending if they have bones or not and now we now characteristics about animals that last year we did not know. We have learnt that some animals have a life cycle as frogs or butterflies. We worked that in Spanish in Cono and in English in Science. Here you can see our final work.

MY HOUSE (3rd level)

In the 3rd level of primary we are studying the parts of the house. As individual work we have done these houses that students have colored and cut, they also have written the names of some objects that appear in the house.

WORD LIST

OPAQUE	TRANSLUCENT	TRANSPARENT
SPECTRUM	REFLECTION	REFRACTION
IMAGE	NORMAL	ANGLE
SURFACE	INCIDENT	RAY
REFLECTED	RAY	WHITE
BLACK	ABSORB	REFLECT
TRANSMIT	MIRROR	LENS
GLASS	DIAMOND	

LIGHT (4th grade)

Children from 4th grade have been studying hard science in English this year. Last unit has been light and this is a good example of what they are learning:

Some students from 5th and 6th year have worked in a play called "A crazy Story", they were different characters from different tales, they have been working in the play during the breaks with teacher Marisa, and at the end they performed that play to all their schoolmates.
